AssistX

Assistive Call Systems

Secure calling in intensive care, at home, in residential groups, in nursing homes and clinics.

AssistX

Assistive Call Systems

Secure calling of care givers and relatives

It is important for people with disabilities to feel safe and to be able to call for help quickly and safely at any time. In intensive care, at home, in residential groups, homes and clinics, the requirements are often very individual. The secure, wireless **AssistX-Call System** offers **different ways to trigger a call**:

By switches and sensors

By sound and speech

By sipping and puffing

By small head movements

With your communication device by eye or head control

By pulse oximeters & ventilators

SECURE CALLING

- In intensive care
- at home
- in residential groups
- in nursing homes
- in clinics

AssistX-CALL SYSTEM - EVERY CALL IN SAFE HANDS!
